Notice Concerning Impact of Earthquake occurred off the coast of Fukushima Prefecture

RENOVA, Inc. expresses its support and solidarity towards those who have recently been impacted by the earthquake that occurred off the coast of Fukushima Prefecture at about 23:34 and 23:36 on March 16, 2022.

As for the damage, a part of piping fell at the construction site of the Ishinomaki Hibarino Biomass Power Plant under construction, but the impact is currently being investigated. We have confirmed that this earthquake has not caused any damage on our other operating and under construction large-scale solar PV plants and biomass power plants in Tohoku and Kanto regions.

If any new damage or similar development occurs in the future that may have financial impact, we will promptly make another announcement.
